

For every product, the right

Case.

# Welcome

**Dear customers and potential customers,**

Our cases are more than just a storage place. They are like a home for your professional equipment. A home that is not only high-quality, sturdy and durable, but that also fits your products perfectly thanks to individual customisation. Your tools, presentation materials, goods or sensitive instruments will be well protected and securely packed!

With this catalogue, we would like to give you an insight into our versatile case and packaging world. Get inspired and discover the endless possibilities. Do you have questions, or do you already have an ideal case in mind? Don't hesitate to contact us. You won't have to figure it out on your own; together, we'll develop the optimal packaging solution.

**You can trust the quality cases and packaging solutions from Hofbauer.**

Thank you for your interest,

Your Hofbauer team

## Hofbauer – The right Choice

### **You tell us what you need – we care about it**

Do you want well-organized storage for your tools? Do you want to protect sensitive instruments? Do you need a transport solution that can withstand wind and weather? Do you want to present your goods and advertising to best effect?

Then Hofbauer is the right choice for you! With us, you'll get to your ideal case in three simple steps. You tell us the intended use and the contents of your case. We'll advise you in the selection of case model and case format, and develop a recommendation for the interior and exterior design. Then your individual case will be fabricated.

### **We're committed to quality – your desires are our benchmark**

With premium materials and professional workmanship, we offer high-quality products with guaranteed durability. Our quality management system and our ISO 9001 certification, among other things, ensure that we meet these high standards.

Whether you want to securely store and transport tools, special equipment or sensitive instruments, we'll find exactly the right packaging solution for you. And then your products are guaranteed:

**packed. protected. hofbauer.**

# Packaging solutions for more than 110 years

**1930**

Hofbauer developed case solutions for the automotive industry – the birth of case production.

## Our beginnings

The name Hofbauer stands for high-quality and innovative products since 1902. It all began with the idea to produce industrial transport packaging. Gregor Hofbauer produced the first commercial containers out of wood, metal, textile and leather in 1902. These were followed by wood and metal trunks and cases for the emerging automotive industry. The beginnings of today's Hofbauer Case Range were already in the making.

And from the beginning, our products have been "made in Germany".

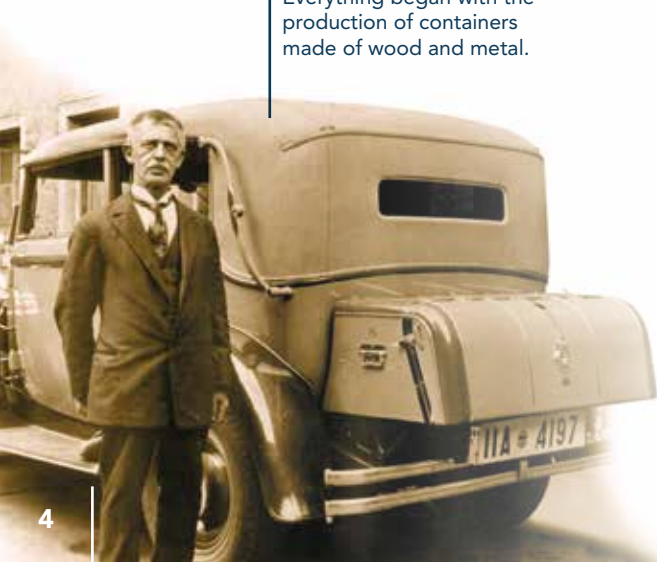

EXPERIENCE  
SINCE **1902**

## New directions

The 70s represent a milestone in our company's history. Hofbauer produced the first plastic cases through the application of new technologies (extrusion blow moulding and plastic injection moulding). For its time, the "Airbag" was a revolutionary briefcase and presentation case. This decade also saw the appearance of the Citybag series, which has proven to be a classic amongst industrial cases.

**1902**

Gregor Hofbauer founded Gregor Hofbauer GmbH. Everything began with the production of containers made of wood and metal.

**1950**

Hofbauer designed packaging solutions to protect and transport world-renowned typewriter and camera brands.

**1970**

Plastic cases were produced for the first time using extrusion blow moulding systems. The Airbag appeared for the first time. The first Citybag was also produced in this decade.

# Tradition meets innovation

## Towards a successful future

We're continuing our great history, and we're always developing new high quality and innovative products for our customers. A total of 80 employees work at two sites and produce cases, packaging solutions and technical plastic parts for various industries (e.g. automotive, construction or electronics). We serve a variety of customers – from small-scale enterprises to large brand-name companies. Moreover, Gregor Hofbauer GmbH supports our distribution partners as a components partner and supplier in the most important markets in Europe and beyond.

## Unique in Europe

As a specialist in extrusion blow moulding technology and injection moulding, we offer cases in more than 500 different sizes and 16 different designs. With an almost unlimited range of design options for case interiors, we provide the perfect packaging solutions for your needs – from simple presentation cases, to elegant sales packaging, to high-end measurement cases. Completely custom-made case production is also possible thanks to our technical standards.

We accompany our customers from case selection up to finished interior and exterior design – making the whole process straightforward and reliable.

And all is "made in Germany".

## Explorer

### Our case series for extreme security

Durability and extreme robustness – those are the main features of our EXPLORER case series, the packaging and transport solution for extreme applications, both on land and at sea. A HOFBAUER EXPLORER is your perfect companion for bringing even the most sensitive equipment to your destination in a watertight, weatherproof and secure manner.

# Explorer

PROBABLY THE STRONGEST CASE IN THE WORLD

Key p. 10 / 11

- 25 sizes in two standard colours
- Extremely robust, shock-proof and watertight packaging and transport solution
- Huge choice of accessories

## Colour palette\*

### Case:

- black
- orange

\* other colours upon request

Stackable with profiled stacking aids that protect against slipping.

### Robust & recyclable

The Explorer is manufactured from extra-strong, durable, recyclable polypropylene.

### Resistant to harsh temperatures

Heat and cold will not harm the Explorer. It can be used in a wide temperature range from -30 °C to +90 °C.

### Watertight

Due to the neoprene seal, the Explorer is watertight with an IP67 rating (up to 10 m depth) and dustproof.

### Corrosion-resistant

All metal parts in the Explorer are corrosion-resistant.

### Suitable for air travel

The Explorer is hermetically sealed; an automatic valve provides pressure equalization.

### Suitable for use by the army

Explorer cases meet NATO specifications and most packaging standards.

### Pressure-resistant

The Explorer is pressure-resistant both when standing up and when lying down.

### Stackable

with profiled stacking aids that protect against slipping.

### Shock-proof

The construction and material thickness makes Explorer shockproof – even high sensitivity equipment is perfectly protected.

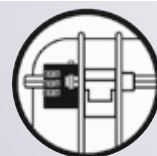

### Special colours

Army green and other special colours available upon request.

### Resistant to acid

The Explorer's material, hinges and handle are resistant to acid.

### Lockable

Securely lockable with a combination lock or with a padlock.

**Trolley** – container with integrated pull-out handle and transport wheels

Container with transport wheels

All containers are optionally available with sturdy feet

## Standard range of sizes\*\*

Ext. dim. in mm - L x W x H	180 x 200 x 195 to 2080 x 930 x 600
Int. dim. in mm - L x W x H	155 x 155 x 165 to 2020 x 875 x 560

\*\* Custom sizes and dimensions available

Available  
in more than  
**400 standard sizes**  
(among others in  
19 inches)!

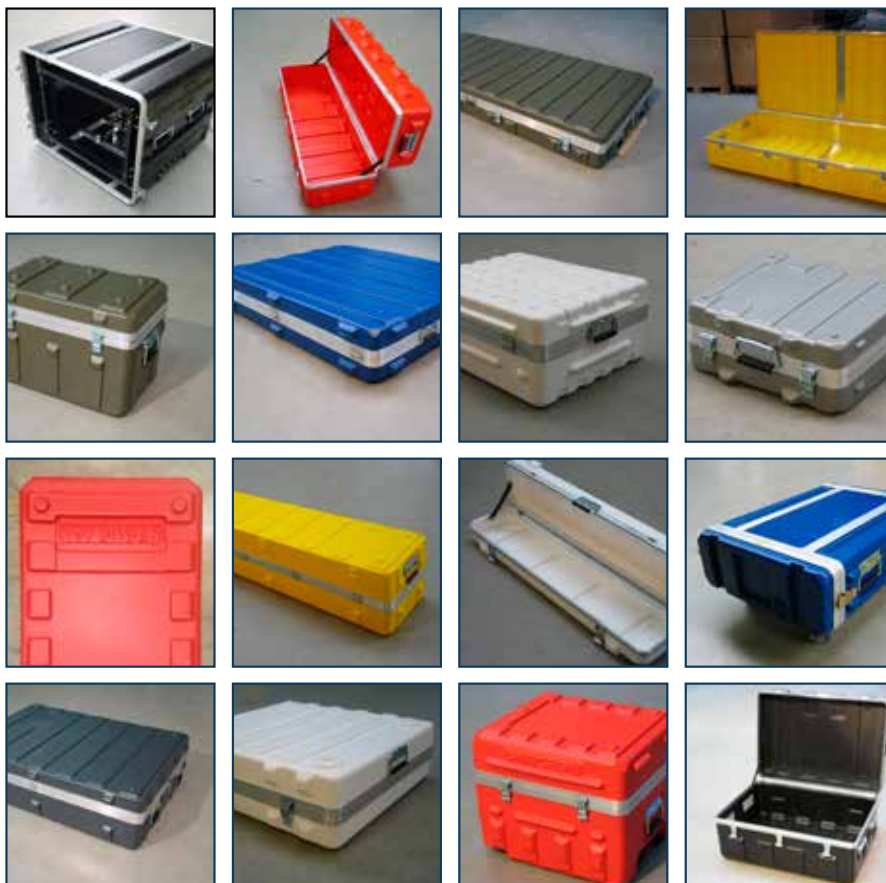

Case model for  
19-inch racks

## Advantages:

- Depending on the version, the container can meet the highest civilian or military packaging norms (e.g. IP norms, ATA 300. Cat. 1 of the aviation industry – a container with 40 kg contents that has fallen from a height of 1 m 280 times must still function properly afterwards –, meets requirements according to the American MIL-STD, MIL-PFF or ASTM)
- Easy handling
- Functional & stable
- Reusable
- Excellent resistance to impact, scratching and breakage
- High chemical resistance

# Optional Fittings

There are many possibilities for individualizing the internal design of your case

## Foam inserts

Perfectly cut to the shape of your products

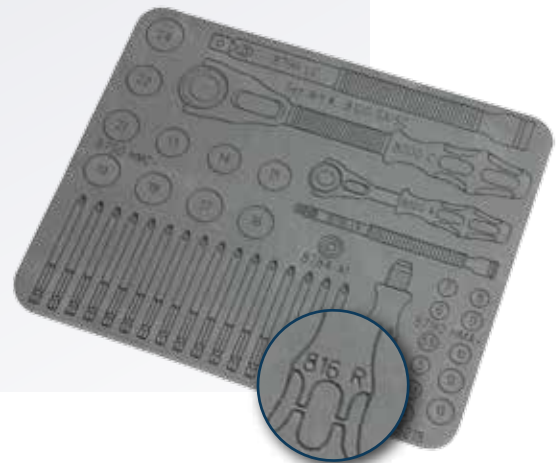

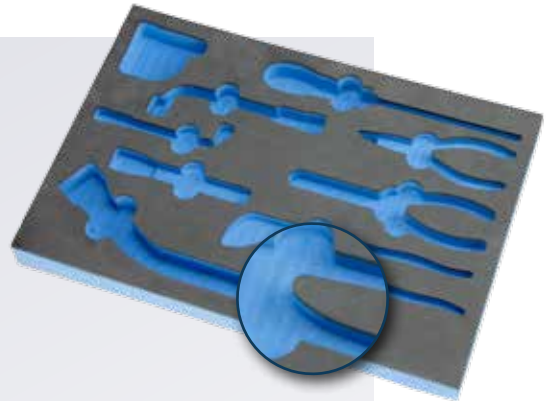

- CNC milling
- Water jet cutting
- Contour cutting
- Embossing
- Profile cut

Secure protection through the selection of high quality foam types

- Large selection of soft and hard foams
- Egg-foam sheets for case lid

Design possibilities

- Single-coloured and multicoloured foam inserts
- Shadow boards
- Laser marking of logo or text
- Printing on the foam surface
- Textile covering of the surface

## Moulded foam inserts

- Special properties offer extraordinary protection
- Materials (EPS, EPP, EPE)

## Thermoformed inserts:

- Plastic case inserts
- Fitted to your parts
- Dirt and moisture resistant
- Removable and washable

## Inner wall customisation with double-walled cases

- The technically and economically perfect solution for long-term projects
- The insert is firmly integrated in the case, and virtually indestructible
- Absolutely impervious to water, oil, dust, and more.
- Washable with all common cleaning agents

## Individually fitted textile pockets

## Dividing plates and document compartments

## Customised extensions

- E.g. for measuring cases, service cases and more.
- Completely individualised finishes to the customer's specifications
- Use of a large variety of materials and processing methods

Another option:

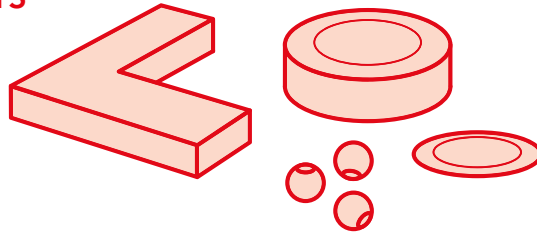

## cardboard sleeve

We are happy to offer you a fitted cardboard sleeve for your case. This packaging solution is ideal for accommodating very comprehensive product information.

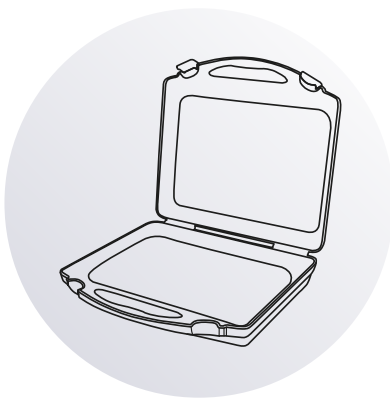

# 3 Steps to Your Packaging Solution

## 1 YOUR PRODUCTS

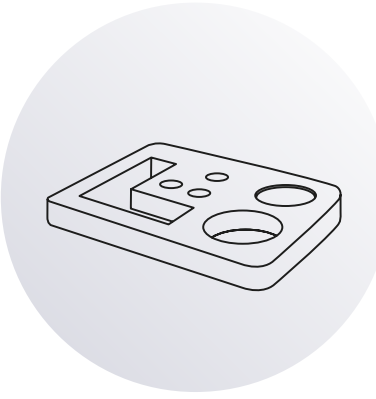

Provide us with information about your products such as size, form, weight, or share drawings of your products. Or send us the products that you need to package.

## 2 OUR SERVICE - We create a packaging concept for you

### THE RIGHT CASE

Selection of case according to size, design and technical properties

### THE INTERIOR DESIGN

We make a proposal in accordance with your requirements and our experience for the optimum arrangement, presentation and packaging of your products in the case.

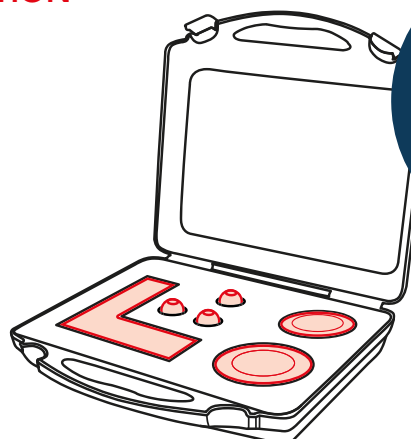

### THE EXTERIOR DESIGN

The case is given its own identity with silk screen printing, digital printing, stickers or reliefs in the wall of the case.

## 3 YOUR PACKAGING SOLUTION

Your individual ideal case
